*The project is co-financed by the Interreg Cooperation Programme V-A
Slovenia-Hungary within the European Regional Development Fund.*

Several projects have already been or are currently being implemented through the instrument of sustainable tourism in the current program period of the Cooperation Programme INTERREG V-A Slovenia-Hungary, where they are promoting and preserving the natural and cultural heritage in the program area. These projects have appropriate cross-border character and added value for their project areas, but their implementation was more or less isolated from each other.

In the second period of the project, which lasts from 1.9.2020 - 28.2.2021, we will perform in-depth project interviews. The implementation is based on the composed SI-HU PRO sample of in-depth verification interview, based on real situation.

We will contact pre-determined representatives of the lead partners. A summary of the in-depth interviews will be presented in the Cross-Border Fact-Finding Report.

With the possibility of coordinated sustainment of project results and harmonized communication on different levels as well as with joint planning of further developments for the future in the area of sustainable tourism, the project focuses on the establishment of a common cross-border coordination network, which will connect projects with the topic of sustainable tourism, approved in the CP Interreg V-A SI-HU in the period of 2014-2020.
